Yogurt Lab.

You may wonder, when will science merge with deliciousness? The answer: it already has. Edina, long in need of a dessert destination, now has its very own DIY frozen yogurt experience. Shoppers at 50th & France can explore 16 frozen yogurt flavors (on tap) and 60 toppings for a deliciously important experiment. A sleek stainless steel lab station sits between complex equations on the "blackboard" and the Periodic Table of Flavors displayed on the wall. Simply choose your flavor, add your toppings, weigh your creation at the register, and enjoy your automatic A+.
