

architecture & interior design

Hollywood Theatre.

In Northeast Minneapolis, we undertook a dramatic historic renovation of the iconic Hollywood Theater, thoughtfully reimagining it as a vibrant event and gathering space. Our design approach honored the building's rich architectural legacy, carefully preserving its historic character—from the ornate detailing to the grand spatial proportions—while introducing modern functionality and renewed energy. The original seating area was transformed into a flexible venue for gatherings and performances, creating a dynamic blend of past and present. This adaptive reuse project breathes new life into a cherished landmark, ensuring its story continues for generations to come.
