

architecture & interior design

MN Tile & Stone.

We designed a dynamic working showroom that serves both professional designers and the public, creating an environment that is as functional as it is inspiring. Housed within a warehouse featuring full slabs of materials on-site, the space was carefully planned to allow hands-on exploration and selection. Warm, inviting lounge areas encourage visitors to relax, collaborate, and design in comfort. The result is a thoughtfully integrated showroom experience—part workspace, part creative retreat—where materials and ideas come together seamlessly.
